

# VERSIGARD<sup>®</sup> COOL GRAY EPDM

Versico Roofing Systems' VersiGard Cool Gray EPDM is a 60-mil non-reinforced roof membrane. It may be used for new construction and re-roofing applications and is available in a 10' x 100' roll. VersiGard Cool Gray EPDM is a game changer and the only EPDM membrane in the market ideal for locations where heating and cooling days are equal.

## What Are Heating and Cooling Degree Days?

Degree days are measures of how cold or warm a location is by comparing the mean outdoor temperatures recorded for a location to a standard temperature, usually 65°F. Heating degree days are when the mean temperature is below the 65°F threshold; cooling degree days are when the mean temperature is above the 65°F threshold.

What should you choose when heating and cooling days are equal? Consider Cool Gray EPDM! It is a great option to help keep heating and cooling costs to a minimum.

# VERSIGARD COOL GRAY EPDM

## Features and Benefits

Offers reflectivity while still providing a "dry-down" effect

Added slip resistance of rubber and less glare than white roofs

540% elongation and weathering resistance result in superior hail damage resistance

The most dimensionally stable, heat-resistant membrane; stays flexible even in extremely cold conditions, down to -40°F

A SINGLE SOURCE FOR SINGLE-PLY ROOFING
