

SecurEdge™ METAL

EX Heavy Gauge Fascia

Overview

Carlisle's SecurEdge EX Heavy Gauge (HG) Fascia provides the maximum protection against wind uplift damage that is available in today's roofing market. This product features an attractive appearance backed by an engineered design tested for long-term, worry-free performance and compliance with all relevant building codes. Additionally, the unique design allows for a heavier-gauge cover than standard extruded bar/cleat fascia profiles. The full snap-on design features a heavy-duty extruded aluminum bar/cleat and cover piece in either 22 or 24 GA galvanized steel and .040", .050", or .063" aluminum. Both the bar/cleat and cover piece come in 12' lengths that provide fewer joints/seams and fewer sections to handle for faster installation without the need to strip-in, which is typical with many other roof edge designs.

Features and Benefits

- » Interlocking, concealed splice plates prevent moisture migration
- » Manufactured in convenient 12' lengths with pre-punched fastening holes to allow for thermal movement and ensure correct placement of provided fasteners
- » Factory-fabricated miters and accessories ensure a proper fit and provide a cleaner appearance while eliminating the need for field fabrication
- » Available in five convenient sizes in a variety of gauges and finishes
- » Radius pieces are available to meet the unique needs of each project
- » When re-roofing, the anchor bar can be removed, cleaned, and reinstalled at any time without compromising its strength and appearance

- » ANSI/SPRI/FM 4435/ES-1 tested to comply with International Building Code
- » Factory Mutual approved
- » Miami-Dade and Florida Building Code approved

Installation

For complete installation instructions, refer to Carlisle specifications and details, or visit www.metalera.com/brands/carlisle.

Finishes

- » Natural mill-finish aluminum
- » Pre-finished Kynar® standard and low gloss
- » Premium metallic Kynar
- » Anodized aluminum – clear, dark bronze, and black
- » Drexlume™ – Acrylic-coated galvalume
- » HDG90 galvanized steel
- » Custom post-painted Kynar finishes available upon request
- » Please consult color chart for color and gauge/thickness availability; non-stock combinations require minimum order and extended lead time

Quality Assurance

Tested per ANSI/SPRI/FM 4435/ES-1 Test Methods RE-1 and RE-2 for evaluation of membrane securement strength. Fascia shall be certified by Carlisle to design pressures as indicated in current edition of ANSI/SPRI ED-1 Design Standard for Edge Systems Used with Low Slope Roofing Systems. Meets International Building Code requirements. Miami-Dade approved to comply with the High-Velocity Hurricane Zone of the Florida Building Code.

Technical Services

Engineering and shop drawings, as well as long-form specifications and CAD details, are available from Carlisle. Product samples, detail sheets, color chips, and color charts are also available for submittal packages. For personal assistance with questions or submittals, contact Carlisle or your local Manufacturer's Representative.

SecurEdge[™] METAL

EX Heavy Gauge Fascia

Specifications

Fascia Model	Face Height	Nailers Covered
HG-AF-40	4"	1
HG-AF-55	5.5"	2
HG-AF-70	7"	3
HG-AF-85	8.5"	4
HG-AF-100	10"	5

Warranty

Carlisle's SecurEdge EX Heavy Gauge (HG) Fascia is warranted in conjunction with the roofing system in an Edge-to-Edge warranty up to 30 years with 120 mph wind speeds. A non-prorated 35-year Kynar finish warranty is also available.
