

Introducing the RADIUS™ App by Carlisle

Versico Roofing Systems is pleased to announce the continued expansion of RADIUS, our mobile-first digital platform designed to provide roofing professionals with fast, convenient access to product information, technical resources, and jobsite support tools, wherever their work takes them.

Built to serve contractors, distributors, and roofing professionals, RADIUS places valuable resources directly into the hands of users through a simple, intuitive mobile experience. Today, RADIUS is available for both Apple® iOS and Android™ devices, giving users access to critical information whether they are in the office, meeting with customers, or on the rooftop.

Access Information Faster

RADIUS was created to eliminate the need to search through websites, emails, and multiple platforms for the information needed to move a project forward. The app currently provides access to product information and resources for Versico Roofing Systems.

Current features include:

- Product and system information at your fingertips
- Access to technical documents and resources
- Data sheet viewing and sharing capabilities
- Installation-related content and support materials
- Product and training videos directly in the app
- Offline access to downloaded resources
- Favorites and saved content for quick retrieval
- Fast search functionality across available resources
- Resource sharing capabilities for teams and project stakeholders

Download and Install Today

RADIUS is available for both iPhone and Android devices.

Apple iOS

Download the app from the Apple App Store:
Radius by Carlisle

The Future of RADIUS: From Desk to Deck

While the current RADIUS experience delivers product information, technical resources, and jobsite-ready tools through a mobile platform, this represents only the beginning of a broader digital vision.

Carlisle is actively expanding RADIUS into a connected digital ecosystem designed to support users throughout the entire project lifecycle. Planned enhancements include expanded project and job management capabilities, enhanced collaboration tools, and web-based experiences that extend RADIUS beyond mobile devices.

BUILDING VALUE

Our long-term vision is to create a platform that helps contractors and industry partners manage projects from beginning to end – connecting people, products, expertise, and information through a single digital experience. As new capabilities are introduced, RADIUS will continue to evolve into a valuable resource that supports your work anywhere, from desk to deck.

Download RADIUS today and keep the product information, technical resources, and jobsite tools you need within reach, no matter where you are.
