

Insulation Fastening Plates

Typical Properties and Characteristics

Size	3" Round
Weight/ Carton	37 lbs. (16.8 kg)
Quantity	1,000/ Carton
Material	Galvalume®-Coated Steel
Thickness	26 Gauge
Corrosion Resistance	Galvalume-Coated Steel meets FM-4470

Typical properties and characteristics are based on samples tested and are not guaranteed for all samples of this product. This data and information is intended as a guide and does not reflect the specification range for any particular property of this product.

Overview

Carlisle's Insulation Fastening Plates are specifically designed for attachment of insulation and cover boards under Carlisle roofing systems. Insulation Fastening Plates are stamped from Galvalume®-coated steel for long-term protection against corrosion. The round design provides an even distribution of loads and eliminates sharp corners that can damage insulation.

Installation

1. Position Insulation Fastening Plates per Carlisle Specifications.
2. Secure Insulation Fastening Plates using the appropriate Carlisle fastener.

Review Carlisle specifications and details for complete installation information.

Precautions

- » Eye protection is recommended during drilling and installation of fasteners.
