

VERSICO'S QA TPO MEMBRANE

Versico's VersiWeld® QA TPO roofing membrane with pre-applied adhesive combines the energy efficiency and durability you expect from Versico's VersiWeld TPO with the easiest installation in the industry. Our quick-applied technology saves labor and improves membrane performance, which translates into satisfied building owners.

Lay-Flat Technology

Years of extensive trials comparing various adhesives and substrates have resulted in a self-adhering TPO membrane with the perfect combination of high-performance adhesive and membrane from the industry leader in TPO manufacturing. This advanced membrane and adhesive combination partnered with Versico's state-of-the-art manufacturing capabilities offers consistent adhesion and resistance to unwanted evidence of membrane expansion to provide a finished rooftop appearance void of wrinkles or blemishes.

Enhanced Membrane Performance

QA TPO membrane provides a consistent 10 mills of high-strength adhesive across the entire width of the sheet, providing uniform adhesion throughout the field of the roof. QA installations also result in fewer wrinkles, no membrane fluttering, and reduced stress on fasteners, plates and membrane. The lack of solvents and odors from bonding adhesives is ideal for occupied buildings.

Benefits of QA TPO

- Adhesive retains tackiness in cold temperatures
- Consistent adhesive application provides uniform performance
- No odors or VOCs to disrupt building occupants
- Provides up to 80% labor savings
- Cool roofing properties contribute to building envelope energy efficiency
- Available in White, Gray and Tan

Low Temperature Formulation

Versico's cutting-edge adhesion technology enables roofing applications to extend further into the cold season, with effective bonding at lower temperatures, starting at 25°F and rising.
