

XL Gutter Product Updates – Effective April 30, 2026 May 2026

We would like to inform you of changes to our **SecurEdge™ XL Gutter** product offering. These updates took effect **April 30, 2026**, and are intended to streamline our manufacturing process, support additional production capacity, and enable improved parts stocking moving forward.

An updated print approval is attached for your reference. Please note that attached copies are intended for reference only. Customers should always refer to the online print approvals for the most current revision and latest approved documents.

Summary of Changes

1. Standard Sizes

To better align with the most frequently specified sizes over the past two years, the number of standard sizes has been reduced.

- **Previous standard sizes:** 8", 9", 10", 11", 12", 13", 14"
- **New standard sizes:** 8", 10", 12", 14"

2. Pre-Attached Gutter Cleat – Material and Gauge

The pre-attached gutter cleat will now be manufactured using a standardized material, gauge, and color. While the cleat color may not match the gutter finish, it is fully concealed after installation by the lower mounting hanger and will not be visible.

The **lower mounting hanger will continue to match the gutter color**, ensuring a consistent and seamless appearance once installed.

Additional Information

- Any **active quotes or existing orders** that include discontinued sizes at the time of launch will be processed as originally submitted.
- These changes apply to **new quotes entered on or after April 30, 2026**.

If you have any questions or need additional information, please don't hesitate to reach out.

Thank you,

Jordan Wenger
