

**LIQUISEAL® Liquid Flashing**  
April 27, 2018

**To: Versico Roofing Systems' Authorized Contractors**

Versico Roofing Systems is pleased to introduce LIQUISEAL Liquid Flashing. This two-component, polyurethane-based system creates a reinforced, cold-applied liquid flashing that is compatible with all Versico EPDM, TPO, PVC, and KEE HP membranes and is ideal for flashing oddly shaped penetrations and tying together dissimilar roofing systems without building a knee wall or impeding drainage.

LIQUISEAL Liquid Flashing is UV- and color-stable, solvent-free, low-VOC, and virtually odorless. Unlike PMMA-based products, LIQUISEAL Liquid Flashing is pre-measured and easy to use. Versico is also pleased to introduce the following accessories and primers for use with LIQUISEAL Liquid Flashing:

- LIQUISEAL Metal Primer – Used to prime metal, EPDM, and other non-porous surfaces
- LIQUISEAL Concrete & Masonry Primer – Used with Surfacing Sand to prime concrete, masonry, and other porous surfaces
- Spiral Agitator – Used to mix resin properly
- Surfacing Sand – Used with Concrete & Masonry Primer to promote proper adhesion and mechanical bond.

Product Code	Product Description	Stocking Location(s)	Package Quantity
330890	LIQUISEAL Metal Primer	C, G, T	15/ctn
330891	LIQUISEAL Liquid Flashing Resin - .5G	C, G, T	8/ctn
330892	LIQUISEAL Liquid Flashing Resin - 1G	C, G, T	can
330893	LIQUISEAL Flashing Fleece 13.8" x 164'	C, G, T	3 rolls/bag
330896	LIQUISEAL Spiral Agitator	C, G, T	2/ctn
330894	LIQUISEAL Flashing Fleece 27" x 164'	DS	1 roll/bag
330897	LIQUISEAL Concrete & Masonry Primer - .25G	DS	15/ctn
330898	LIQUISEAL Concrete & Masonry Primer - 1.1G	DS	can
330899	LIQUISEAL Surfacing Sand - 50 lb.	DS	bag
