

ALERT

New Gray PS Elastoform and Universal Sealant November 11, 2022

To: Carlisle SynTec Systems' Authorized Applicators

Carlisle SynTec Systems is pleased to introduce two new products for use in approved gray Sure-Weld® TPO details: 12" x 50' Sure-Seal® EPDM Gray Pressure-Sensitive (PS) Elastoform Flashing and Gray Universal Sealant. These new products were created based on the popularity of using Sure-White® PS Elastoform on TPO details and the increasing prevalence of gray TPO roofs.

The 12"-wide Gray PS Elastoform allows applicators to cut whatever flashing size is needed for the various details they encounter on the roof.

Gray Universal Sealant can be used to seal the edges of Gray PS Elastoform after priming the edge to ensure adhesion to both EPDM and TPO substrates. Gray Universal Sealant is packaged 12 tubes per carton and is great for use on top of Termination Bar.

Listed below are the new part numbers and ordering information.

Product Code	Description	Stocking Locations
348768	Sure-Seal Gray PS Elastoform 12" x 50'	C, G
349227	Gray Universal Sealant CT/12	C, G

C = Carlisle, G = Greenville

For more information regarding pricing and availability, please contact your local Carlisle Manufacturer's Representative.

Sincerely,

Ronald L. Goodman
