

**Shelf Life Extended on Uncured VersiGard® White EPDM Flashings**  
**May 18, 2021**

**To: Versico Roofing Systems' Authorized Contractors**

Versico Roofing Systems is pleased to announce the shelf life on all uncured VersiGard® White EPDM flashings has been extended from six months to nine months.

Versico's EPDM chemist was able to refine the formulation for VersiGard White EPDM uncured flashing to match the shelf life of black VersiGard EPDM uncured flashings at nine months. The new formulation was put into production in March of last year so that all the product you are currently working with or have on hand would be the new formulation.

The new nine-month shelf life applies to the following VersiGard White EPDM uncured flashings:

- VersiGard White EPDM Peel & Stick Uncured Flashing
- VersiGard White EPDM Peel & Stick Inside/Outside Corners
- VersiGard White EPDM Peel & Stick Pourable Sealer Pockets
- VersiGard White EPDM Peel & Stick T-Joint Covers

As always, store your uncured flashings in cold or cooler locations and apply heat prior to installation to maximize the formability and adhesion of the product.

Versico continues to add value through a focus on innovation and improvements to existing products. If you have any questions, or for more information, please contact your Versico Independent Sales Representative.

Sincerely,

Ronald L. Goodman  
EPDM Marketing Manager
