

CARLISLE'S AUTHORIZED APPLICATORS MARKETING ANNOUNCEMENT

PVC-2013-03
HydroBond™ PVC Water-Based Adhesive
May 22, 2013

To: Carlisle SynTec Systems' Authorized Applicators

Carlisle SynTec Systems is pleased to announce the expansion of its Sure-Flex™ PVC product line with the introduction of HydroBond PVC Water-Based Adhesive. HydroBond is a high-strength, one-sided wet lay-in dispersion adhesive for use with all Sure-Flex PVC and Sure-Flex FleeceBACK® products. It is ideal for bonding PVC membranes in a wet lay-in application to various porous and non-porous substrates on slopes up to 2:12, and also works as a contact adhesive on higher slopes and vertical surfaces. HydroBond offers a laborsaving application and long-lasting, high-strength bond. The adhesive can be roller-applied or spray-applied. It meets the requirements of South Coast Air Quality Management District Rule 1168 as well as the requirements of the OTC Model Rule for Single-Ply Roofing Adhesives and is not classified as HAZMAT.

<u>Product Description</u>	<u>Packaging</u>	<u>Part Number</u>
HydroBond PVC Water-Based Adhesive	5-gallon pail	322112

Features and Benefits:

- One-sided, wet lay-in application
- Easily applied with medium nap roller
- Easily spray-applied with 3000 PSI sprayer
- Up to 100 square feet per gallon coverage with roller application
- Up to 135 square feet per gallon coverage with spray application
- Long-lasting, high-strength bond
- Low-VOC content (less than 120.5 g/l)
- 12-month shelf life (sealed container)
- No HAZMAT restrictions

Please contact your local Carlisle manufacturer's representative or distributor if you have questions regarding the new HydroBond PVC Water-Based Adhesive.

Sincerely,

John Greko
PVC Product Manager
