

ALERT

DensDeck® ProFast™ Prime
March 2026

To: Carlisle SynTec Systems' Authorized Applicators

Carlisle SynTec Systems is pleased to add DensDeck ProFast Prime which is specifically designed for mechanically fastened and adhered roofing systems, including TPO, PVC, and EPDM. It has a robust gypsum core with a fiberglass mat facer and delivers excellent resistance to fire (FM Class 1, UL Class A), wind uplift, punctures, foot traffic, and hail. This product is lightweight and versatile, allowing more square footage per truck and making handling easier.

This product is approximately 20% lighter than standard 1/2" DensDeck boards, significantly reducing handling strain and speeding up installation. The reduced weight allows ~25% more boards per truck optimizing logistics and lowering transportation costs. The enhanced core improves uplift performance, allowing for a reduction in the number of fasteners needed for given uplifts.

Product Code	Product Description	Size
363963	3/8" DENS-DECK PROFAST	4x8 (1,152 FT ²)
