

Carlisle SynTec Systems offers a variety of product literature with valuable information about products, systems, warranty options, and installation requirements. Below is an overview of some commonly requested product literature available on the Carlisle website.

SYSTEM SHEET

A System Sheet provides an overview of the components, typical application, and other requirements of a particular Carlisle roof system.

System Sheets typically include the following information:

- » Overview of System Components
- » System Features and Benefits
- » Membranes and Accessories
- » System Strengths
- » System Codes
- » Quality Assurance
- » Warranty Information

SELL SHEET

A Sell Sheet provides an overview of a specific Carlisle product or system, its capabilities and selling features, and supporting data about product or system benefits.

Sell Sheets typically include the following information categories:

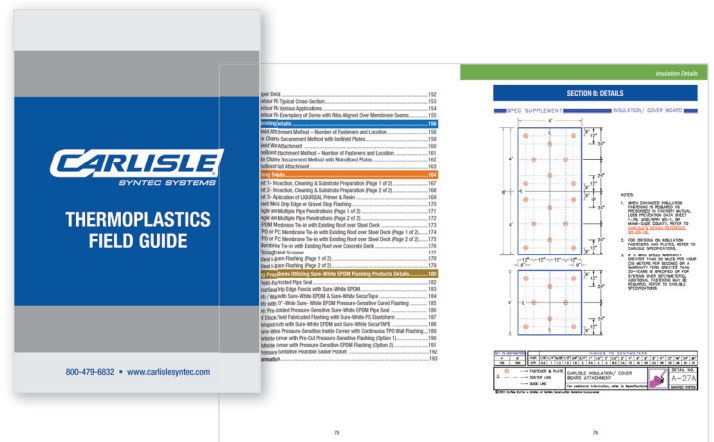

- » Product Overview
- » Technology Capabilities
- » Product Performance
- » Features and Benefits
- » Selling Points

FIELD GUIDES

Field Guides were developed to serve as an installation reference for applicators, quality assurance personnel, or anyone involved in the rooftop installation process.

Field Guides typically include the following information categories:

- » System Descriptions
- » Product Information
- » Installation Procedures
- » Quality Control Information
- » Common Installation Issues
- » Staging and Storage Best Practices
- » Specifications and Details

SYSTEM BROCHURE

A System Brochure provides a complete overview of a particular Carlisle system and its product offerings.

System Brochures typically include the following information:

- » Overview of System and Product Offerings
- » System Advantages
- » Warranty Coverage
- » Sustainability Attributes
- » System Options
