

CARLISLE'S AUTHORIZED APPLICATORS MARKETING ANNOUNCEMENT

ID-2016-10

Low-VOC Membrane Cleaner

September 22, 2016

To: Carlisle SynTec Systems' Authorized Applicators

Carlisle SynTec Systems is pleased to introduce its new Low-VOC Membrane Cleaner, a solvent-based cleaner formulated with federally exempted solvents. Carlisle's Low-VOC Membrane Cleaner is compliant with California and Utah VOC regulations and can be used in a wide range of temperatures.

Packaged in easy-to-use, one-gallon cans and five-gallon pails, Low-VOC Membrane Cleaner quickly and easily removes dirt and other contaminants from EPDM membranes prior to the application of primer. The product is also ideal for cleaning TPO membrane prior to welding the membrane or applying primer, and can significantly improve membrane aesthetics.

<u>Description</u>	<u>Product Code</u>	<u>Packaging</u>	<u>Weight</u>	<u>Stocking Location</u>	<u>Coverage Rate*</u>
Low-VOC Membrane Cleaner (1-gal)	326160	2 1-gal cans per carton	18 lbs/carton	Tooele, UT	approx. 400 SF/gal
Low-VOC Membrane Cleaner (5-gal)	326860	5-gal pail	47 lbs/pail	Tooele, UT	approx. 400 SF/gal
*Coverage rate is dependent on the level of membrane contamination.					

Carlisle will continue to offer its standard Weathered Membrane Cleaner for use in areas that are not impacted by VOC regulations related to cleaners.

If you have any questions, or for more information, please contact your local manufacturer's representative.

Sincerely,

Michael Puzdrak
Manager, Thermoplastics Product Development
