

DA-2020-03
Code Guide Update
October 12, 2020

To: Carlisle SynTec Systems' Manufacturer's Representatives, Distributors, and Authorized Applicators

Carlisle SynTec Systems' most recent Code Approval Guide, which is traditionally updated twice a year, is now available on the Carlisle website. In addition to information about product additions and deletions, some important changes have been made. Some key updates are highlighted below:

- A new guide grouping all VSH (very severe hail) rated assemblies has been added. These VSH-rated assemblies are listed as part of the various roofing systems.
- A new guide has been created for self-adhered EPDM (EPDM SAT) membrane assemblies.
- With the increased popularity of CAV-GRIP® III, and as a result of additional approvals, this product has been included in various RoofNAV numbers as an approved equal. These assemblies have been identified with blue markings in the FM sections of the guides (RoofNAV number listed in blue).
- With the introduction of FleeceBACK® RL PVC, several new UL approvals have been added to the RapidLock™ Guide.

In addition, due to successful testing, EcoStorm VSH™ has replaced OSB cover board in various assemblies. Several assemblies reflecting new Dade County approvals were also added to the PVC guide.

You can access the new Code Approval Guide on the Carlisle SynTec website; on the top dashboard, select Documents and then click on Codes.
