Re: Edge-to Edge Warranty Discount Program

To further support the adoption of Carlisle Edge-to-Edge systems, Carlisle SynTec Systems is pleased to announce the implementation of a new Edge-to-Edge Warranty Discount Program effective June 1, 2026. The following warranty discounts will apply to any qualifying Edge-to-Edge warranty issued after June 1, 2026:

- $0.01/SF warranty discount for Edge-to-Edge warranties utilizing qualifying flat sheet metal.
    - Projects utilizing the Sure-Tite™ Cleat Program will qualify under the flat sheet discount structure.
- $0.03/SF warranty discount for Edge-to-Edge warranties utilizing Carlisle SynTec Systems' prefabricated edge metal systems.

Please note the following program requirements and limitations:

- A maximum discount cap of $2,000 per warranty will apply.
- The Edge-to-Edge discount is not applicable if any other warranty reductions or discounts have already been applied.
- Warranty pricing will not fall below the published minimum fees listed on the current Warranty Matrix.
- While an invoice is not required to issue the Edge-to-Edge warranty itself, a valid invoice showing the appropriate qualifying edge metal purchase must be submitted to receive the warranty discount.
- Applicators who currently have warranty applications in the Warranty Portal in which warranties have not yet been issued and wish to receive the warranty reduction should upload the applicable invoice(s) to those applications. Uploading the invoice(s) ensures that the appropriate reduction is applied when the warranty is issued.

For information regarding qualifying flat sheet products or Carlisle's prefabricated edge metal systems, please contact your Manufacturer's Representative.

Thank you for your continued partnership and support.
