EPDM-2018-21

Sure-White® EPDM Product Line Additions

December 18, 2018

To: Carlisle SynTec Systems' Authorized Applicators

Carlisle SynTec Systems is excited to add two new accessory options to the Sure-White EPDM product lineup.

8" Sure-White EPDM Pressure-Sensitive Pourable Sealer Pockets – These 8" pockets are ideal for sealing irregular or hard-to-flash penetrations on Sure-White EPDM and Sure-Weld® TPO roofing systems. In the past, contractors were restricted to a 6" -diameter pocket; the new 8" option will allow them to tackle larger penetrations with ease.

6" Sure-White EPDM Pressure-Sensitive T-Joint Covers – These 6" x 6" factory-cut T-Joint Covers consist of a top layer of Sure-White Elastoform Flashing® laminated to a bottom layer of Pressure-Sensitive SecurTAPE™. This product is ideal for sealing field splice intersections, horizontal-to-vertical transitions of field splices, and perimeter edge metal joints on Sure-White EPDM and Sure-Weld TPO systems. Using pre-cut T-Joint Covers results in increased productivity and a more uniform appearance across the roof.

| Description | Product Code | Packaging | Weight | Stocking Location(s) | Shelf Life |
|---------------------------------|--------------|-----------|-----------|----------------------|------------|
| 8" White Pourable Sealer Pocket | 332890 | 12/ctn | 9 lbs/ctn | C, G | 6 months |
| 6" White T-Joint Covers | 332871 | 20/ctn | 3 lbs/ctn | C, G, T | 6 months |

C = Carlisle, G = Greenville, S = Senatobia, T = Tooele

If you have any questions, please contact your manufacturer's representative.
