

## UPDATE UPDATE

Edge Metal Warranty Enhancements September 26, 2025

## To: Versico Roofing Systems' Authorized Contractors

Versico Roofing Systems is in a unique position to provide the most convenient edge metal systems for inclusion in warranted systems. With the acquisition of MTL (Metal-Era and Hickman) combined with the existing network of Drexel Metals and Petersen Aluminum Corporation locations, Versico Roofing Systems can provide nationwide access to flat sheets for field-fabricated edge systems or prefabricated, ES-1, and FM-certified edge systems.

Almost all high-wind low-slope roof failures begin at the windward edge, and a proper edge system design is critical. Inclusion in the manufacturer's system warranties is an excellent way to ensure building owners have a single-source Edge-to-Edge Warranty. **Effective November 1, 2025**, Versico is implementing the following improvements to our metal edge policies to make it more convenient to get an Edge-to-Edge Warranty:

- Versico flat sheet metal that is field-fabricated is eligible for up to a 20-year, 90-mph wind speed Edgeto-Edge Warranty.
- Requests for Edge-to-Edge warranties exceeding 20 years <u>OR</u> 90 mph require Versico-branded prefabricated edge metal.
- Any warranty greater than 20 years <u>AND</u> 90 mph requires a Versico Edge-to-Edge Warranty using Versico-branded prefabricated edge metal.
- All factory-prefabricated edge metal (MTL) must be purchased through the Versico Roofing Systems brand to be eligible for an Edge-to-Edge Warranty.
- We have implemented price parity across our prefabricated metal brands to ensure competitive and consistent pricing.
- We will remove the requirement to provide an invoice when Versico flat sheet metal is selected during the completion of the Copy A for a warranty. We will be implementing a process to identify CCMbranded flat sheets in case of a warranty claim on an Edge-to-Edge Warranty.
- Please contact your Versico Roofing Systems Independent Sales Representative for the Versico flat sheet metal brands that are eligible for Edge-to-Edge Warranties.

Versico is primary in all aspects of edge metal fabrication, from flat sheets to prefabricated cleats and edge systems, with locations across the US. Please be sure to talk to your customers about the benefits the Versico Edge-to-Edge Warranty provides.
