

VERSIFLEECE®

Productivity Checklist

Increase your productivity by taking advantage of Versico Roofing Systems' labor-saving products. Use this checklist as a guide.

VersiFleece Advantages

- Additional Membrane Securement** – Eliminates angle change securement for 20-year and 90-mph system designs (excludes expansion/control joints)
- Direct Recovery Options** – Single-ply, modified, and SPF. Eliminates the need for a cover board in certain situations

VersiFleece Membranes

- VersiFleece TPO with APEEL™ Protective Film** – Eliminates the need to power-wash TPO membrane for a potential cost savings of up to 60%
- VersiFleece RapidLock EPDM and TPO Membranes** – Eliminates adhesive string-time or flash-off and provides up to 80% labor savings when compared to other fully adhered systems
- VersiFleece FR TPO** – Achieves UL Class A fire rating when mechanically attached directly to a combustible deck.

Adhesives and Primers

- Flexible DASH 15- and 50-Gallon Drums*** – Reduces membrane application time up to 93% when compared to traditional installations using bonding adhesives on non-VersiFleece systems
- Flexible DASH Dual Tanks*** – Eliminates maintenance and reduces application time up to 60% when compared to traditional installations using bonding adhesives
- CAV-GRIP™ 3V Low-VOC Adhesive/Primer to Adhere VersiFleece Membranes to Vertical Walls** – Up to 60% labor savings when compared to traditional installations using bonding adhesive

Insulation Adhesives

- Flexible DASH*** – Eliminates the need to pre-drill into concrete and gypsum decks

Cover Board

- SecurShield® HD Polyiso** – ½" board achieves UL 790 Class A combustible deck assembly rating without the use of a fire-rated slip sheet or gypsum cover board.

EPDM Flashings (RapidLock EPDM Systems Only)

- QA Cured Coverstrip** – Eliminates the need for T-Joint Covers on 115-mil VersiFleece systems
- Pre-Cut QA Inside/Outside Corners and T-Joint Covers** – Eliminates the need for field cutting
- Prefabricated QA Pourable Sealer Pockets** – Eliminates the need for field-fabrication
- QA Cured Coverstrip for Overlaying Seams** – Eliminates the need for Lap Sealant and T-Joint Covers
- 20" Quick-Applied Cured Flashing** – Eliminates the need to apply bonding adhesive and wait for flash-off

TPO Flashings

- Prefabricated Inside/Outside Corners, Universal Corners, and T-Joint Covers** – Eliminates field-fabrication for up to 400% labor savings
- Prefabricated Split Pipe Seals, Square Tube Wraps, and Curb Wrap Corners** – Eliminates the need for T-Joint Covers at splice intersections

PVC Flashings

- Prefabricated Inside and Outside Corners** – Eliminates the need for cutting and field-fabrication, forms easily into out-of-square corners
- Molded Pipe Seals** – Eliminates the need for cutting and field-fabrication, may be used to flash pipes and penetrations from ¾" to 8" in diameter
- Prefabricated Split Pipe Seals** – Eliminates the need for cutting and field-fabrication, ideal for wrapping pipes with obstructions
- Prefabricated Square Tubing Wraps** – Eliminates the need for cutting and field-fabrication, provides a professional finished look

Air and Vapor Barriers

- VapAir Seal™ MD** – Eliminates the need for gypsum cover boards on steel decks

* For VersiFleece PVC and TPO
