

New Cool Gray 60-Mil Non-Reinforced EPDM
April 24, 2024

To: Versico Roofing Systems' Authorized Contractors

Versico Roofing Systems is pleased to introduce its new VersiGard® Cool Gray 60-mil Non-Reinforced EPDM for Adhered Roofing Systems. Versico's VersiGard Non-Reinforced EPDM has been performing in the field for more than 60 years with industry-leading UV weathering, and we are excited to launch a gray color option for EPDM.

The use of gray membranes has been steadily increasing as they provide a balance between reflectivity for summer cooling needs, while also providing some winter heat gains and dry-down effect to minimize potential condensation issues within the roofing assembly. The medium gray color has less glare, dries the roof faster, and hides dirt pick-up better than highly reflective white membranes. Cool Gray EPDM Quick-Applied accessories can also be used on VersiWeld® Gray TPO, as the color is a great match! This is an excellent option for hard-to-flash details and eliminates the need to use a generator or welders for repair work on TPO.
