

## Carlisle SynTec Systems' Rooftop Recycling Rebate Incentive Program

For more than 10 years, Carlisle has partnered with Nationwide Foam Recycling to offer Authorized Applicators an environmentally friendly Rooftop Recycling Program aimed at reducing the environmental impact caused by roof tear offs. To help increase participation in the program, Carlisle has begun offering a financial incentive to Authorized Applicators who utilize the Rooftop Recycling Program by offering a rebate on the materials that are used to replace the torn-off roof, when those materials are purchased and warranted through Carlisle.

### WHY?

- » Reduces the cost to recycle = increased rooftop recycling.
- » Carlisle is committed to sustainability – reducing impact on landfills is a top priority.
- » Return of post-consumer recycled materials is imperative to meet our sustainability goals.
- » Continuing development of new products made of post-consumer recycled content.

### HOW IT WORKS

- » Authorized Applicators contacts Nationwide Foam Recycling to notify them of the project and set up a date and time for material pick up. (Refer to Carlisle's Rooftop Recycling Program Sell Sheet for more information.)
- » When arranging the return, the Authorized Applicators must notify Nationwide Foam Recycling that the roof will be replaced with a Carlisle SynTec Systems roof.
- » Authorized Applicators must return at least the membrane to be eligible for the rebate. (Note: torn-off/returned materials do not have to be Carlisle materials.)
- » Roof must be replaced with a Carlisle Total System Warranty roof system and brought up to current rooftop thermal efficiency requirements per the locally adopted energy code. The addition of a ½" coverboard is required at a minimum.
- » When completing your Carlisle warranty application submittal, select "re-roof/tear off" for the "roof status." You will then be given the option to select the box were the torn-off/existing insulation and membrane materials recycled using Carlisle's recycling partner, Nationwide Foam Recycling.
- » Once selected and the warranty submittal is completed, Carlisle will process the rebate using the project information provided. A rebate check will be sent directly to the Authorized Applicator within 4 weeks of warranty close out.

### REBATE PAYOUT INFORMATION

**Carlisle will provide \$0.04/ft<sup>2</sup> based on the area of PVC, EPDM, and TPO membrane recycled.**  
**Rebate will be paid at time of warranty issuance.**
