

**Recycled  
Polyiso Saves  
Contractor Money,  
Diverts Waste  
From Landfill**

**Job Location:**  
Allen, TX

**Job Size:**  
120,000 sf

**Yield:**  
Ten (10) 48' trailer  
loads of 2.5" Polyiso

## Did You Know?

Carlisle has been partnering with NFR since 2014 to recycle XPS, EPS, and Polyiso insulations, as well as TPO, EPDM, and PVC roofing membranes.

Recycling programs save re-roofing contractors money and help them win bids.

Re-roofing contractors who recycle help building owners exceed their LEED® and sustainability goals.

Nationwide Foam Recycling (NFR) provided recycling services for the re-roofing project at Allen Premium Outlets in Allen, TX.

NFR provided live load pick-ups of 2.5" Polyiso foam insulation using 48' flatbed trailers. In just two weeks, NFR picked up ten (10) truckloads of insulation, which saved the roofing contractor over \$16,000 in avoided disposal costs.

Prior to bringing NFR onto the job, the roofer had a full-time person staged at the 30-yard trash dumpster cutting, fitting, and stacking the insulation to try to reduce the number of dumpster swaps needed. The project manager stated that stacking and loading insulation onto NFR trailers was simpler, more efficient, and reduced their labor costs.

When asked to critique NFR's service, the project manager said that NFR communicated well and showed up for pick-ups when scheduled. The only regret he had was not finding NFR sooner.

**The Meijer Company Achieves Sustainability Goals with Commitment to Recycling Re-roofing Materials**

**Job Location:**  
MI, OH, KY, IN

**Job Size:**  
Four (4) roofs, totaling 959,000 sf

**Yield:**  
96,000 lbs of EPDM and TPO Membrane

The Meijer Company operates 204 grocery stores throughout the Midwest. As part of their commitment to sustainable operations, Meijer requests that membranes removed from their grocery stores during re-roofing should be recycled. NFR has been the go-to recycling company for re-roofing job sites across North America, providing services to more than a few of Meijer's roofers over the years. In the spring of 2020, NFR provided recycling services at four (4) Meijer projects. Upon completion, NFR issued certificates of recycling to Meijer, giving their sustainability manager something to crow about!

*Nationwide Foam Recycling helps re-roofing contractors save money and reach their sustainability goals by recycling ISO, XPS, and EPS Foam Insulation Boards as well as EPDM, PVC, and TPO roofing membranes.*

*Unlike traditional recyclers that focus on straightforward waste streams like corrugated cardboard and metal, NFR specializes in recycling difficult wastes.*

**To reach your project sustainability goals, please call Nationwide Foam at 888.820.2760.**
