

Carlisle SynTec Systems Training and Education Center

Carlisle's 68,000-square-foot Training & Education Center (TEC) is the commercial roofing industry's first and only dedicated training facility. The TEC, which opened in 2018, hosts a wide range of no-cost training and certification classes for contractors, architects, consultants, and other construction professionals. Featuring a 135-seat auditorium and five indoor roofer training areas, the TEC is designed to provide year-round opportunities for hands-on learning in a comfortable, indoor setting.

CARLISLE SYNTEC SYSTEMS TRAINING OPPORTUNITIES

Certification Seminar

Certification Seminar is a prerequisite to becoming a Carlisle Certified Applicator. The class is also open to Carlisle-recognized sales representatives, distributors and manufacturers who would like to gain an overall understanding of roofing installations and best field practices.

Certification Seminar Highlights:

- » 2.5 day training
- » Classroom and hands-on training on how to complete common details including curbs, corners, and roof penetrations
- » Product overview
- » Certificate of Completion

Features:

- » In-depth detail installations
- » Overview of membrane systems
- » Specialty installations and best practices
- » Fleece-backed membranes
- » Induction welding
- » Polyurethane foam adhesives

Foreman's Workshop

Foreman's Workshop is intended for individuals who already possess the skills to install single ply systems, but need a better understanding of inspection guidelines, customer relations and labor-saving techniques. Instructions and guidance provided by seasoned FSR Trainers.

Foreman's Workshop Highlights:

- » 5 day training
- » Sessions offered in the spring season
- » Primarily hands-on training
- » Smaller class size
- » Certificate of Completion

Features:

- » Complete single-ply roof system installations
- » Vapor barrier installations
- » Insulation attachment patterns
- » New product showcasing and hands on
- » Inspection, investigation and repair procedures

Benefits of a Carlisle Training Course

- » Comprehensive understanding of Carlisle system products and applications
- » Install a roofing system from start to finish under Carlisle supervision
- » Reduced number of RFW (repair for warranty)/punch list items on final inspections
- » Fewer claims on installed roof systems
- » Roofing consultants and specifiers increasingly prefer trained contractors
- » Carlisle's experienced trainers translate complex information in a stimulating, interactive, hands-on learning environment
