Authorized Applicator

**ID-2019-10**

**EcoStorm VSH New Product Announcement**

**April 4, 2019**

## To: Carlisle SynTec Systems' Authorized Applicators

Carlisle SynTec Systems is pleased to introduce EcoStorm VSH® Cover Board. This product is an engineered composite building material made from a proprietary blend of plastic and cellulose fiber, which is sourced from post-industrial and post-consumer waste streams. EcoStorm VSH is a durable, extremely moisture- and mold-resistant material with a core that does not disintegrate or delaminate in the presence of water.

EcoStorm VSH offers a variety of features and benefits, including:

- Extreme moisture and mold resistance
- FM Very Severe Hail (VSH) approvals (pending)
- Ultra-high compressive strength of 3,990 psi
- Coated glass facer on top surface of board
- High impact resilience – won't chip or crack
- Sustainability Champion award available for diversion of post-consumer waste from landfills
