

VERSIFLEX™ PVC

The Ideal Choice for Restaurant Rooftops

Versico's VersiFlex PVC roofs are the ideal choice for restaurant rooftops, providing the strength and durability needed for excellent long-term performance. Compared to other single-ply membranes, PVC offers superior resistance to animal fats, chemicals, greases, and oils exhausted onto restaurant rooftops. PVC membranes also have the highest fire resistance of any roofing membrane, providing additional protection against grease and oil fires.

Resistance to Chemicals

VersiFlex PVC offers superior resistance to animal fats, oils, greases, and cleaning chemicals commonly exhausted onto restaurant rooftops.

Resistance to Foot Traffic

VersiFlex PVC is classified as Type IV — the strongest/highest rating available — according to the ASTM D4434 PVC standard. Strengthened by tenacious reinforcing fabrics, enhancing resistance to punctures and tears from rooftop maintenance and equipment servicing.

Avoid Downtime and Maximize Revenue

VersiFlex PVC's fire-resistant and self-extinguishing properties reduces the chances of a grease or oil fire spreading. This minimizes the financial impact of a fire and lets the restaurant recover quicker.

VERSIFLEX PVC

The Ideal Choice for Restaurant Rooftops

Versico's PVC membrane offering

Versico's VersiFlex PVC is available in a variety of thicknesses, widths, colors, and reinforcement types, which means that Versico has a membrane for almost any roofing project. Standard PVC and KEE HP-enhanced membranes are available in 50-, 60-, and 80-mil thicknesses, and in 40.5", 5', 81", and 10' widths. Versico also offers both polyester and fiberglass-reinforced membrane, as well as a line of fleece backed VersiFleece® PVC and KEE HP membrane for superior physical protection.

Why choose Versico?

Versico offers cutting-edge, high-performance products and top-notch customer service and support throughout your project. Versico only works with highly skilled authorized contractors trained in the latest roofing techniques, so building owners are assured a top-quality installation. Versico employs a team Field Service Representatives (FSRs) who can provide technical backup on the jobsite. FSRs also perform a thorough inspection of the completed roof to ensure compliance with Versico's rigorous standards.

Quick and Simple Installation

Complete the job faster with Versico's wide selection of labor-saving products and a complete line of custom and prefabricated accessories. VersiFlex PVC and KEE HP roofing systems are fast and easy to apply in a wide range of temperatures with minimal disruptions which means less time spent on the roof, and more time focusing on your restaurant.

Industry-leading warranties

Versico protects your roofing investment with warranties ranging from five to 30 years, depending on your PVC system. Versico's Total System Warranties are No Dollar Limit (NDL) warranties, which means that they do not depreciate over time or require a costly maintenance program. With a Versico warranty, you can rest assured that your roof will perform optimally for years to come.

Typical PVC System Assemblies

VersiFlex Fully Adhered PVC Roofing System

Typical Application

- 1 VersiFlex 50-, 60-, 80-mil Reinforced Membrane
- 2 Bonding Adhesive
- 3 Versico Fasteners and Plates
- 4 Approved Versico Insulation
- 5 Approved Roof Deck

VersiFlex Mechanically Attached PVC Roofing System

Typical Application

- 1 VersiFlex Reinforced Membrane
- 2 Versico Fasteners and Plates
- 3 Approved Versico Insulation
- 4 Approved Roof Deck

VersiFleece Fully Adhered PVC Roofing System

Typical Application

- 1 VersiFleece PVC and KEE HP Membrane
- 2 Elongating Flexible DASH Adhesive
- 3 Approved Versico Insulation
- 4 Approved Roof Deck
