

Playland Arcade Castaway Cove OCNJ

JOB PROFILE

The Project

Name: 17,500 Square-Foot New Construction Addition to Playland Arcade

Address: 1020 Boardwalk, Ocean City, NJ 08226

Project duration: June 2023 – January 2024

Contractor: AAMCO Roofing LLC

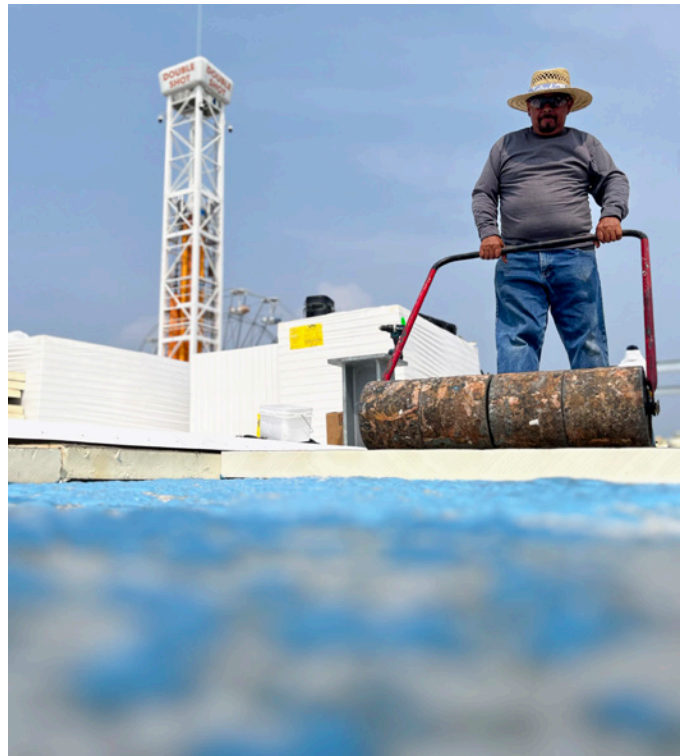

Products

- DensDeck® Prime ½" Cover Board adhered with Flexible DASH™ Adhesive utilizing the splatter method
- 2 layers of 3.0" VersiCore® Polyiso Insulation adhered with Flexible DASH Adhesive utilizing the splatter method
- 80-mil VersiWeld® TPO membrane adhered with CAV-GRIP® 3V Low-VOC Adhesive

Versico's Splatter Application Method for Flexible DASH Adhesive Saved Time and Money

Playland's Castaway Cove is a long-standing amusement park located on the Ocean City New Jersey boardwalk. Offering amusement rides, go karts, and mini golf, Playland's Castaway Cove is Ocean City's oldest amusement park, celebrating over 55 years in business. When part of the park was expanding to include an arcade, AAMCO Roofing LLC, a Versico contractor since 2008 and based in Runnemede, NJ, was selected for the job.

AAMCO Roofing decided to install an 80-mil VersiWeld TPO membrane, adhered with CAV-GRIP Low-VOC Adhesive and primer. For the insulation installation, Flexible DASH Adhesive was chosen to fully adhere the insulation. Mark Martino, Owner at AAMCO Roofing said, "We chose to use the splatter application method with Flexible DASH Adhesive to save time and money. Once we ran the numbers, we saw the potential savings right away."

In 2020, Versico introduced the splatter application method for Flexible DASH Adhesive, which is approved for both membrane and insulation attachment when using Versico-approved dispensing equipment. Flexible DASH splatter application provides benefits including consistent application, approved aesthetics, improved performance, and coverage rates. By moving from 4" beads to splatter application, Flexible DASH splatter application was able to provide up to 55% more coverage. Martino noted, "Using a rig and drums, we were able to get a lot of the material down in a day."

Once the insulation was installed, AAMCO Roofing installed the 80-mil VersiWeld TPO membrane using Versico's CAV-GRIP 3V Low-VOC Adhesive and primer. Once the project was complete, the roof system received a 20-year Total System Warranty with 120-mph wind speed coverage.

The new building will house a brand new arcade at Playland's Castaway Cove beginning the summer of 2024.
