OPTIM-R® Vacuum Insulated Panel (VIP)

July 26, 2018

To: Carlisle SynTec Systems' Authorized Applicators

Carlisle SynTec Systems is pleased to introduce the OPTIM-R Vacuum Insulated Panel (VIP), a unique solution for roofing projects with insulation height restrictions. Modifying parapets, raising curbs, and the presence of through-wall scuppers and penthouse doors often make it costly to add the amount of insulation required by the building code or desired by the owner. Carlisle's OPTIM-R provides an R-38 insulating value in a 2.6" total system thickness, as well as a variety of other features and benefits, including:

- Highest insulating value in the thinnest profile
- R-38 in a 2.6" total system thickness with up to 35% infill (non-VIP product)
- Ideal for projects with insulation height restrictions
- Over 90% recyclable (by weight)
- Up to five times the R-value of commonly used roofing insulation products.

SecurShield® HD Polyiso is installed above and beneath OPTIM-R panels using Flexible FAST™ Adhesive to provide protection and serve as a substrate for the roofing membrane. Please note: OPTIM-R cannot be cut or punctured and must be protected on the rooftop.

Product Code	Description
332495	1.6" (40mm) OPTIM-R VIP 23.6" x 23.6" (600 mm x 600 mm)
332494	1.6" (40mm) OPTIM-R VIP 23.6" x 47.2" (600 mm x 1200 mm)
Product Notes	
Plan for a five- to 10-day lead time before product <u>ships</u> from Winchester, VA.	
Shipments to WA, OR, CA, NV, AZ, NM, UT, CO, WY, ID, and MT will incur a 10% upcharge to cover the high freight costs to ship to these states. For shipments to AK and HI, contact customer service for a freight quote. Minimum order of \$25,000 worth of material to these states.	
No freight charges for shipments to all other states. Minimum order quantity of \$6,000 worth of material to these states.	

If you have any questions, or for more information, please contact your manufacturer's representative.

Sincerely,

Chad Buhrman – Insulation Product Manager
