Sure-White® EPDM PS Accessories with Sure-Weld® TPO Roofing Systems

August 17, 2017

To: Carlisle SynTec Systems' Authorized Applicators

Carlisle SynTec Systems is pleased to announce that a number of productivity-boosting Sure-White EPDM Pressure-Sensitive (PS) accessories are now approved for use on Sure-Weld TPO roofing systems with up to 20-year Total System Warranties. Sure-White EPDM PS accessories can provide substantial labor savings when completing hard-to-flash penetrations, and are often ideal for circumstances in which the use of a generator and hand welder are not practical.

Product Description	Product Code	Stocking Location(s)
Sure-White PS Uncured Elastoform Flashing 12" x 50'	309951	C, G, S, T
Sure-White PS Inside/Outside Corners and T-Joint Covers	310310	C, G, S, T
Sure-White PS Pourable Sealer Pockets	316243	C, G
Sure-White PS Pipe Seals	316593	C, G, S, T

The following approved details utilizing Sure-White EPDM PS accessories on Sure-Weld TPO membrane systems can be found on the [Carlisle website](#): Pre-Molded Pipe Seals, Field-Fabricated Pipe Flashing, Field-Fabricated Inside and Outside Corners, Molded Sealant Pockets, and T-Joint Covers at Membrane Splice Intersections.

In addition, a number of Sure-White EPDM PS accessories will now be stocked in all four of Carlisle's TPO membrane stocking locations: Carlisle, PA; Greenville, IL; Senatobia, MS; and Tooele, UT.

An attachment outlining installation requirements and procedures has been added to Carlisle's TPO Specification. This document, [available here on Carlisle's website](#), can be a helpful resource for consultants and general contractors who request more information about this new program.

If you have any questions, or for more information, please contact your Carlisle Manufacturer's Representative.

Regards,

Michael Puzdrak
TPO Product Development Manager
