Specifications

Description	Package	Dimensional weight
OverFlow 4"	Each	1 lb.
OverFlow 2"	Each	1 lb.

Overview

The OverFlow accessory is a spun aluminum round drain attachment. The product is designed to be used with retrofit and new connection drains that are supplied with a clamping ring assembly. The purpose of the overflow drain assembly is to provide additional water drainage, if necessary, when water level on the roof exceeds 4" in height. 2" OverFlow is also available.

Features and Benefits

- » Fits all Carlisle Insert Drains that come with a clamping ring.
- » Constructed of .050" spun aluminum.
- » Provides additional drainage when water level exceeds 4".
(Also available in 2".)
- » Simple and easy to install.
