

To: Industry Professionals or whom it may concern

Thank you for your inquiry regarding an SDS for Carlisle Sheeting and accessory products. The following list of Carlisle products are considered to be an "Article" as under normal conditions of use they do not pose a hazard in the work place or to the building occupants. Since these products or "Articles" pose no health hazard under normal conditions of use there is no requirement for an SDS. For technical information on each of these products please refer to the Product Data Sheet (PDS) or Technical Data Bulletin (TDB) published on the Carlisle website at [www.carlislesyntec.com](http://www.carlislesyntec.com)

**Articles as defined in 29 CFR 1910.1200:**

- |   |                                     |
|---|-------------------------------------|
| Dens-Deck cover boards                  | Drylights and associated curbs      |
| Securock cover board                    | FR and Modified base sheets         |
| Commercial roofing fasteners and plates | SecurEdge metal edgings and copings |
| Expanded Polystyrene insulations        | HP Recovery Board                   |
| Extruded Polystyrene insulations        | Fastening and Termination Bars      |

**Background Information:** OSHA promulgated the Hazard Communication Standard (HCS), also known as the "Right to Know" rule, to ensure that the hazards of all chemicals produced or imported into the U.S. are evaluated, and that information concerning their hazards is transmitted to employers and employees. The standard applies **to all chemicals**, which are known to be present in the workplace in such a manner that employees may be exposed to them **under normal conditions** of use or in a foreseeable emergency. For this reason it is incumbent upon manufacturers to assess whether or not their products present a hazard in the work place. The current definition of "**Article**" in **29 CFR 1910.1200** is provided as follows:

**"Article"** – (as defined by OSHA in 29 CFR 1910.1200(c)) means a manufactured item other than a fluid or particle: (i) which is formed to a specific shape or design during manufacture; (ii) which has end use function(s) dependent in whole or in part upon its shape or design during end use; and (iii) which under normal conditions of use does not release more than very small quantities, e.g., minute or trace amounts of a hazardous chemical (as determined under paragraph (d) of this section), and does not pose a physical hazard or health risk to employees.

A product or "Article" meeting this criterion is **exempt** from the SDS requirement. OSHA realizes that manufacturers often provide SDSs for reasons other than those of meeting the requirements of the Hazard Communication Standard and that this can cause confusion to downstream users. Carlisle's intent is to eliminate confusion by publishing SDS sheets for the products that workers and end-users really need to operate in a safe environment. Carlisle SynTec Incorporated believes the information contained herein to be very accurate. It is not to be taken as a warranty or representation for which Carlisle SynTec Incorporated assumes any legal responsibility for product liability. This information is offered solely for our customers' consideration, investigation and any necessary verification. Any use of this information or of the sheeting and accessories provided by Carlisle SynTec Incorporated must be determined by the user to be acceptable for their intended purpose and in accordance with the appropriate federal, state or local laws and regulations including 29 CFR in its entirety.
