

**New Seam Probe**  
**November 12, 2019**

**To: Versico Roofing Systems' Authorized Contractors**

Versico Roofing Systems is pleased to introduce its redesigned Seam Probe, which features a more durable steel tip, a larger and more ergonomic handle, and threads that allow it to be used with a stand-up pole. This new design is ideal for checking the integrity of heat-welded seams on VersiWeld® TPO and VersiFlex™ PVC and KEE HP membranes.

Product Code	Description	Stocking Locations
307687	Seam Probe	C, G, S, T
C = Carlisle, G = Greenville, S = Senatobia, T = Tooele		

If you have any questions or need more information, please contact your Versico Independent Sales Representative.

Sincerely,

Adam Burzynski
