

SureTite™ Galvanized Cleat Program
March 2, 2022

To: Versico Roofing Systems' Authorized Contractors

Versico Roofing Systems is pleased to introduce its SureTite Galvanized Cleat Program, which will allow customers to receive an ES-1 approved cleat on the same truck as membrane and accessory orders. The newest addition to Versico's expansive metal program makes it easy for contractors to dry-in the roofing system by terminating the edge of the roof during the initial installation. When the SureTite Galvanized Cleat is combined with a properly fabricated face covering made from Versico Kynar® Flat Sheets, contractors can achieve an ES-1 approved assembly.

There are two SureTite cleat designs: snap-on fascia and drip edge. Both designs come in four different sizes and there are five finished edge designs. With the snap-on fascia cleat, contractors can complete a snap-on fascia or sloped coping edge system. Using the drip edge, contractors can complete a drip edge, gravel stop, or flat coping edge system.

SureTite Galvanized Cleat Program Benefits:

- SureTite Galvanized Cleats will be stocked in Carlisle, PA, and Tooele, UT
- Distributors can order full pallet quantities to stock in their warehouse
- Cleats can be delivered with roofing package, making it convenient to quickly dry-in the roof system
- When using Versico's prefabricated cleats and flat sheets, Versico will share the ES-1 certification for the project if the cover is fabricated to Versico's specifications, and the roof edge system will be covered under Versico's Total System Warranty
- A 72 MPH wind speed warranty will be available for contractors who are not ES-1 certified through Versico
- An 80 MPH wind speed warranty will be available for contractors who are ES-1 certified through Versico

It's simple for contractors to achieve an ES-1 certified edge that is covered under Versico's warranty.

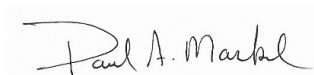

- Choose "Prefabricated Cleat and Versico Kynar Flat Sheet" when filling out your Copy-A
- Purchase the SureTite Cleat of your choice
- Install the cleat and bend your face cover to Versico's specifications, using Versico-branded Kynar Flat Sheets
- Complete the Copy-B and upload your invoice for the materials
- Your edge is ES-1 certified and included in the roof system warranty

SureTite Galvanized Cleats come in 12' lengths with 10 pieces to a bundle. For shipments going directly to jobsites, Versico will allow bundle quantities to be top loaded with the roofing materials. Distributors must order full pallet quantities.

SureTite Galvanized Cleat Program Product Offering				
Product Code	Product Description	Length/Piece	Pieces/Carton	Bundles/Pallet
349032	SureTite 3" Drip Edge	12'	10	40
