

RapidLock TECHNOLOGY

Carlisle SynTec Systems' revolutionary RapidLock (RL™) Roofing System utilizes Velcro® Brand Securable Solutions to provide an adhesive-less roof that matches the performance of fully adhered assemblies. RapidLock's easy installation provides a consistent application that eliminates the variability associated with adhesive cure times.

Why Choose a RapidLock System?

- No application temperature restrictions, great for installation any time of year
- VOC- and odor-free, will not disrupt occupied buildings
- Labor saving adhesive-less membrane attachment system
- Integrated with an adhered slip sheet for ease of installation
- Excellent resistance to hail and punctures
- FM 1-90 approval rating
- Up to 30-year, 120-mph peak gust wind speed warranty available

What are the RapidLock System's Components?

The RapidLock system is comprised of specialty FleeceBACK® membrane and InsulBase® RL or SecurShield® RL Polyiso Insulation. The membrane acts as the hook while the polyiso insulation acts as the loop.

Available Insulation – 4' x 8' panels

- » SecurShield HD – ½"
- » InsulBase – 2", 2.6"
- » SecurShield – 2", 2.6"
- » SecurShield HD Composite – 2", 2.5", 3", 3.5", 4"
