SecurShield HD Composite RapidLock Insulation July 26, 2023

To: Carlisle SynTec Systems' Authorized Applicators

Carlisle SynTec Systems is pleased to add SecurShield® HD Composite RL™ to its RapidLock™ product line. This new product combines the proven performance of SecurShield HD Composite insulation with the award-winning, revolutionary technology of RapidLock. Carlisle's SecurShield HD Composite RL board is comprised of a 1/2-inch-thick HD RapidLock board with a coated glass facer (CGF) that is laminated online to SecurShield polyiso. This creates an extremely strong, rigid, high-performance polyiso board.

About RapidLock: Carlisle's RapidLock roofing system is a revolutionary method of membrane attachment that results in a fully adhered membrane without the use of adhesives. This innovative assembly utilizes VELCRO® Brand Securable Solutions along with FleeceBACK® RL membrane to achieve performance equal to or greater than traditional adhered single-ply systems.

SecurShield HD Composite RL extends the benefits of Carlisle's composites to the RapidLock product line while maintaining the RapidLock benefits you've come to expect:

- Improved resistance to hail and punctures
- Reduced fastener requirements with 6 fastener Factory Mutual 1-90 approval
- 4' x 4' product option available
- No temperature restrictions
- No VOCs or odors
- Adhesive-free system saves time and labor
