FAST™ Winter Grade (IC) Discontinued
December 14, 2017

To: Carlisle SynTec Systems' Authorized Applicators

Carlisle SynTec Systems' FAST Winter Grade (IC) Bag-in-a-Box and Dual Cartridge Adhesive will be discontinued once current inventory is depleted.

Going forward, Flexible FAST Adhesive must be used in situations that previously required winter grade products. Because Flexible FAST can be applied in ambient temperatures of 25°F to 125°F (-4°C to 52°C), winter grade products are no longer necessary. When applying urethane adhesives in temperatures below 70°F (21°C), Carlisle recommends storing containers in a heated area to ensure proper performance and yield.

The following Flexible FAST Adhesive products are now available:

Product Code	Product Description	Packaging Information	Stock Status	Weight/Package
310472	Flexible FAST (Part A)	50-Gal Drum	C, G, S, T	540 lbs
310473	Flexible FAST (Part B)	50-Gal Drum	C, G, S, T	513 lbs
317329	Flexible FAST (Part A)	15-Gal Drum	C, G, T	150 lbs
317331	Flexible FAST (Part B)	15-Gal Drum	C, G, T	135 lbs
