

Reintroduction of DuraStorm VSH™ Cover Board September 25, 2025

To: Versico Roofing Systems' Authorized Contractors

Versico Roofing Systems is pleased to announce the reintroduction of DuraStorm VSH cover board. This product is an engineered composite panel composed of a proprietary blend of plastic and cellulose fiber sourced from post-industrial and post-consumer waste streams. This panel can be adhered using Flexible DASH™ Adhesive or attached with plates and fasteners.

Product Features and Benefits:

- Made of 95% recycled content
- Resistant to moisture and mold
- Achieves FM Very Severe Hail (VSH) approvals with a variety of membranes including bareback TPO/PVC
- Ultra-high compressive strength of 3,990 psi
- Top of the panel features a coated glass facer (CGF)
- Receive a Sustainability Champion Award by using this product for diverting post-consumer waste from landfills

Product Code	Description	Weight	Size	Truckload Quantity
333300	1/2" DuraStorm VSH	64 lbs./panel	4' x 8'	23 units (690 pcs) = 22,080 ft ²

This product is offered exclusively through Versico in a new partnership with Elof Hansson, who produces the panel. Elof Hansson USA Inc. is part of the Elof Hansson Group, an international trading company with roots dating back to 1897. Their headquarters is in Gothenburg, Sweden, and they have offices and agents all over the globe. Elof Hansson Group specializes in forest products with an emphasis on building materials, wood pulp, and paper products.

If you have any questions, or for more information, please contact your independent sales representative.
