

**New 5' x 40' SAT™ EPDM**  
**February 6, 2025**

**To: Carlisle SynTec Systems' Authorized Applicators**

Carlisle SynTec Systems is pleased to introduce 60-mil Sure-Seal® and Sure-White® 5' x 40' Self-Adhering Technology (SAT™) EPDM membrane, representing the ultimate upgrade in membrane portability. Ideal for projects with limited rooftop access, small or cut-up roof sections, or wall applications, our 5' x 40' SAT EPDM rolls can be easily transported on pickup trucks, freight elevators, or up stairwells. And with a weight of about 80 lbs. per roll, the handling and maneuverability of each roll is unlike anything else on the market.

The SAT rolls come ready to install with pre-applied, pressure-sensitive adhesive - so there is no need for bonding adhesives for the field of the roof. By eliminating the loading, stirring, and application of traditional bonding adhesives, you can increase productivity by up to 80% and streamline your installations, even on buildings like the one pictured.

With EPDM's 60-plus years of proven performance, you can be confident in the superior weatherability and hail damage resistance of our new Sure-Seal and Sure-White 60-mil 5' x 40' membranes. The new weight and dimension profiles of these rolls, in combination with Carlisle's Self-Adhering Technology, result in an easy-to-install system that makes applicators more productive and leaves building owners more satisfied.

Product Code	Description	Stocking Location
341303	EPDM .060 Blk NR SAT 5'x40'	Carlisle, PA
359506	EPDM .060 Wht NR SAT 5'x40'	Carlisle, PA

Sold by the pallet with 12 rolls per pallet
