**New Sure-White® Reinforced EPDM**  
**February 17, 2023**

**To: Carlisle SynTec Systems' Authorized Applicators**

Carlisle SynTec Systems is pleased to introduce its new Sure-White Reinforced EPDM for mechanically fastened and adhered roofing systems. Sure-White Non-Reinforced EPDM has been performing in the field for more than 30 years and provides industry-leading UV weathering performance based on proprietary formulations. Carlisle has fine-tuned and optimized these formulations to create a high-performance internally reinforced sheet for use on mechanically fastened roofs.

Mechanically fastened Sure-White Reinforced EPDM achieves a UL Class A fire rating up to a 1/2" slope over InsulBase Polyiso and an FM 1-90 uplift rating when fastened at 6" o.c.

UL Class A fire ratings over SecurShield®, SECUROCK®, DensDeck® Prime, and HP Recovery Board are also available for adhered applications.

Two 60-mil roll options are available: a 10' x 100' sheet and a 10' x 100' sheet with 6" Factory-Applied Tape™. Factory-Applied Tape is a high-quality, reliable, and efficient seaming technology and Carlisle is excited to offer a weld-free option for customers who want a white mechanically fastened system.

Ordering Information		
Product Code	Description	Stocking Location
348766	Sure-White Rein 60-mil 10' x 100'	Carlisle
348781	Sure-White Rein 60-mil 10' x 100' w/ 6" FAT	Carlisle
