

**New Gray EPDM QA Uncured Flashing and Universal Sealant
November 11, 2022**

To: Versico Roofing Systems' Authorized Contractors

Versico Roofing Systems is pleased to introduce two new products for use in approved gray VersiWeld® TPO details: 12" x 50' VersiGard® Gray EPDM Quick Applied (QA) Uncured Flashing and Gray Universal Sealant. These new products were created based on the popularity of using VersiGard White EPDM Peel & Stick Uncured Flashing on TPO details and the increasing prevalence of gray TPO roofs.

The 12"-wide Gray QA Uncured Flashing allows contractors to cut whatever flashing size is needed for the various details they encounter on the roof.

Gray Universal Sealant can be used to seal the edges of Gray QA Uncured Flashing after priming the edge to ensure adhesion to both EPDM and TPO substrates. Gray Universal Sealant is packaged 12 tubes per carton and is great for use on top of Termination Bar.

Listed below are the new part numbers and ordering information.

Product Code	Description	Stocking Locations
348768	VersiGard Gray EPDM QA Uncured Flashing 12" x 50'	C, G
349227	Gray Universal Sealant CT/12	C, G

C = Carlisle, G = Greenville

For more information regarding pricing and availability, please contact your local Versico Independent Sales Representative.

Sincerely,

Ronald L. Goodman
