Polyiso Bundle Double Packaging

April 8, 2019

To: Carlisle SynTec Systems' Authorized Applicators

Carlisle SynTec Systems is pleased to announce that all its Polyiso manufacturing facilities now offer double packaging for 4' x 4' bundles with unique material codes. Contractors often prefer these double packs for jobsite deliveries because they're quicker to unload and stage, which cuts down on crane time.

Double packaging is available for 20 psi and 25 psi InsulBase® and SecurShield® Polyiso in ½" to 4.5" flat product thicknesses. As seen in the photos below, 4' x 4' double packs look like 4' x 8' bundles. Each double pack consists of two 4' x 4' bundles which are placed side by side and shrink-wrapped together.

Single pack

Double pack

Single-pack 4' x 4' bundles will still be available. New product codes have been created for double-pack (DP) bundles; a few examples are shown in the chart below. Please note: The square footage listed in the product descriptions reflects both 4' x 4' bundles in a double pack.

Material Code		Description	FT ²	Pieces
316821	Single pack	2.0 Flat Blk-Blk 20psi 48x48 384sf	384	24
323908	Double pack (new code)	2.0 Flat Blk-Blk 20psi 48x48 768sf DP	768	48
316700	Single pack	1.5 Flat Blk-Blk 20psi 48x48 512sf	512	32
323914	Double pack (new code)	1.5 Flat Blk-Blk 20psi 48x48 1024sf DP	1,024	64
316918	Single pack	2.6 Flat Blk-Blk 20psi 48x48 288sf	288	18
324073	Double pack (new code)	2.6 Flat Blk-Blk 20psi 48x48 576sf DP	576	36

Please contact your manufacturer's representative if you have any questions.

Sincerely,

Chad Buhrman, Insulation Product Manager
