

ALERT

Panasonic ADVANC-R® VIP
February 2026

To: Carlisle SynTec Systems' Authorized Applicators

Carlisle SynTec Systems is pleased to announce a partnership with Panasonic ADVANC-R VIP panels.

This panel is an innovative and cost-effective solution to new construction or re-roofing needs on buildings with height limitations which significantly increases the roofing system's R-value while minimizing its profile. This panel must be sandwiched between either HD polyiso panels or gypsum cover boards to maintain the integrity of the vacuum sealed panel.

Product Features and Benefits

- Center of panel achieves an R-value of 66
- Meets Class A for flame and smoke
- 97% of panel can be recycled Made of a highly porous glass wool structure and absorbents in a vacuum-sealed, aluminum-laminated bag
- Fiber Layer Arrangement Technology (FLAT) provides radically improved thermal performance by aligning the glass wool to reduce thermal conductivity by 60% compared to traditional random orientation

Product Code	Description	Weight	Size	Truckload Quantity
349461	ADVANC-R VIP	5.2 lbs./panel	22.4" x 24.0"	60 pallets/247 sq. ft./pallet
349360	ADVANC-R VIP	10.2 lbs./panel	22.4" x 48.0"	60 pallets/247 sq. ft./pallet

This panel will be stocked in the USA which will lead to shortened lead times. All jobs will be quoted on a job-by-job basis and design assistance can be provided by the Tapered Department.

If you have any questions, or for more information, please contact your Regional Manager.

Sincerely,
