

May 2022 Code Update
May 13th, 2022

To: Versico Roofing Systems' Independent Sales Representatives, Distributors, and Authorized Contractors

Versico Roofing Systems has updated its Code Approval Guides for the spring of 2022. These guides are traditionally updated twice a year, in spring and fall, and are now available on the Versico website. Some of the key updates are highlighted below:

- SecurShield® HD Composite has been added to the VSH Code Approval Guide.
- VersiFleece® approvals have been added with the DensDeck® StormX™ in the VSH Code Approval Guide in both new construction and recover applications.
- SureMB 70 SA RoofNAV numbers have been added to all guides where applicable.
- VersiCore HD has been added to the EPDM, TPO, and PVC Code Approval Guides in the Mechanically Fastened Membrane sections.

You can access the new Code Approval Guides on the Versico website by clicking on the Documents section in the top dashboard. Once the drop-down appears, select "Codes," and then filter these guides by clicking "UL & FM" on the left under "Media Type."

If you have questions, feel free to contact Project Review or the undersigned.

Sincerely,

Chad Wert
Program Manager, Wind
