

VersiTrim™ 2000 Standard and HG Butyl Strip Fascia
December 8, 2020

To: Versico Roofing Systems' Authorized Contractors

Versico Roofing Systems is pleased to introduce VersiTrim 2000 Standard and High Gauge (HG) Butyl Strip Fascia. This innovative metal edge system includes a factory-applied butyl strip on the extruded aluminum anchor bar, eliminating the need for Water Cut-Off Mastic. Contractors can cut their installation time in half and eliminate the mess of Water Cut-Off Mastic with this industry-leading edge system.

The VersiTrim 2000 Standard and HG Butyl Strip Fascia come complete with the anchor bar, fascia cover, and fasteners. Butyl Strip Fascia may be included in Versico's Edge-to-Edge Total System Warranties up to 120 MPH.

Product	Face Sizes	Anchor Bar	Face Material	Fasteners
Standard Butyl Strip	4", 5.5", 7", 8.5"	12' Extruded Aluminum	24-ga. Steel or .040" Aluminum	#10 x 2" Stainless Steel
HG Butyl Strip	4", 5.5", 7", 8.5", 10"	12' Extruded Aluminum	24-, 22-ga. Steel or .040", .050", .063" Aluminum	#10 x 2" Stainless Steel

Versico's Butyl Strip Fascia meets ES-1 and is FM- and Miami-Dade-approved. For more information on available colors for these metal edge systems, please refer to the VersiTrim Color Chart on the Versico website.

Should you have any questions, please contact your Versico Independent Sales Representative.

Sincerely,

Paul Markel
