

VERSITRIM ONE EDGE

ROOF EDGE PRODUCTS

Get an Edge on the Competition

All commercial roofing projects, regardless of size or location, require products with ANSI/SPRI ES-1 testing, to meet the International Building Code. They also require economical pricing and short lead times. That's why Versico's VersiTrim One Edge and Coping products are ANSI/SPRI ES-1 tested, and provide unmatched pricing, significant installation savings and expedited shipping. Versico is able to offer VersiTrim One Edge at a competitive price by eliminating FM design criteria while maintaining the stringent ANSI/SPRI ES-1 requirements. The installed cost of Versico's VersiTrim One Edge products rival even light-gauge roof edge systems fabricated locally or in a roofer's shop with no stripping in or heat welding required.

VersiTrim One Edge (MF/FA Single-Ply)

- 12' lengths for quicker installs and lower labor costs
- Non-penetrating design eliminates stripping in and heat welding
- 24-ga retainer bar
- Pre-punched fastening holes ensure proper installation
- Slotted fastening holes allows for thermal movement
- RE-1: passed
- RE-2 blow-off resistance: 210 lbs/ft²

Building Codes Require ES-1 Tested Roof Edges

Versico offers its roof edge products in a variety of colors and finishes, but one thing always remains the same—dependability.

- Covered under industry-leading warranties
- Part of a comprehensive roof system, including membrane and insulation
