

**Gray LIQUISEAL® Liquid Flashing Resin**  
**July 30, 2019**

**To: Versico Roofing Systems' Authorized Contractors**

Versico Roofing Systems is pleased to introduce the newest addition to its LIQUISEAL product line: Gray LIQUISEAL Liquid Flashing Resin. This new product is very similar to Versico's White LIQUISEAL Liquid Flashing Resin, but it is light gray in color to better match gray VersiWeld® TPO and gray VersiFlex™ PVC membranes.

Gray LIQUISEAL Liquid Flashing Resin is used to create a reinforced, cold-applied liquid flashing solution that is ideal for oddly shaped penetrations. It is compatible with all Versico EPDM, TPO, PVC, and KEE HP membranes and is UV- and color-stable, solvent-free, low-VOC, and virtually odorless.

Product Code	Product Description	Stocking Location	Packaging
333301	LIQUISEAL GRAY FLASHING RESIN (.5G)	Carlisle, PA	8/Carton
333302	LIQUISEAL GRAY FLASHING RESIN (1G)	Carlisle, PA	1-Gallon Pail

If you have any questions, or for more information, please contact your independent sales representative.

Sincerely,

Adam Burzynski
