

TRUE ROOF RATER

Easy. Convenient. Efficient.

The rooftop endures more abuse from the elements than any other part of a building's exterior, so preventative maintenance is critical to prolonging the roof's service life and saving money for you, the building owner. When a roof system is maintained properly, it performs better, lasts longer, and provides more reliable protection of a building and its contents.

That's why Versico Roofing Systems has developed professional rooftop evaluation software perfect for creating quick and easy rooftop evaluation reports.

The True Roof Rater customizable report features a GPS satellite image of your roof and detailed pictures of crucial rooftop components. Also included is a comprehensive description of potential performance issues, the critical nature of those issues, as well as recommendations on how to repair potential problem areas.

“A great way to get a detailed look at your roof from your office.”

True Roof Rater Reports include:

- Web-enabled GPS and mapping technology that provides a comprehensive view of the roof
- Pictures of critical details
- Recommendations on repair solutions

Identify small problems before they become big concerns.

- Extend the performance and lifespan of the existing roof system
- Ensure critical details are performing properly
- Maintain database of pertinent project information

Contact your Versico Sales Rep and ask for your free inspection with True Roof Rater.
