

**USG SECUROCK® Brand Weather Defense™ Roof Board
April 2026**

To: Versico Roofing Systems' Authorized Contractors

Versico Roofing Systems is pleased to now offer USG SECUROCK Brand Weather Defense Roof Board for use in commercial roofing systems including EPDM, TPO, and PVC. Engineered for performance in Very Severe Hail (VSH) regions, Weather Defense provides enhanced durability and protection for demanding roof environments.

USG SECUROCK Brand Weather Defense Roof Board features a high-performance gypsum core with a coated fiberglass mat facer, delivering excellent resistance to fire, moisture, mold, punctures, foot traffic, and hail. The coated facer creates a strong bond surface while reducing adhesive absorption, supporting consistent installation and long-term roof performance.

This product has been tested in assemblies that meet FM VSH classification, as well as FM Class 1 and UL Class A fire ratings, making it well-suited for projects exposed to severe weather and elevated risk conditions. It enables Versico Roofing Systems' first FM-approved EPDM bareback assemblies for VSH applications. Its high compressive strength helps protect roofing assemblies from impact damage and jobsite traffic while enhancing overall system durability.

Product Code	Product Description	Size
376844	5/8" SR Weather Defense 4x8 (960 FT2)	4' x 8' (960 FT2)
376845	5/8" SR Weather Defense 4x4 (960 FT2)	4' x 4' (960 FT2)
