

MARKETING ANNOUNCEMENT

Authorized Applicator

Updated Metal Edge Program
March 2025

To: Carlisle SynTec Systems' Authorized Applicators

Carlisle SynTec Systems is pleased to introduce our updated Metal Edge Program. Carlisle has developed even more ways for our Authorized Applicators to include their metal edge system in our Edge-to-Edge Total System Warranty.

Options to include the metal edge system in our Edge-to-Edge Warranty include:

1. **Carlisle SecurEdge™ Pre-Engineered Edge Systems** – Carlisle offers the highest-performing edge systems in the industry. Our prefabricated systems ensure ES-1 and IBC compliance, come with our highest wind speed performance, and are FM approved. Prefabricated products save the applicator labor, and customized systems will help meet the design needs of the building owner.
2. **SureTite™ Cleats** – Our SureTite Cleat offers the applicator a hybrid approach. The applicator can order the cleat at the same time as their roofing materials, allowing them to terminate the roof system more quickly. By using the cleat, the metal edge system or detail will meet ES-1 and IBC code requirements without going through a certification process. Simply install the cleat and shop-fabricate the cover using Carlisle's Kynar® Flat Sheets and the edge system is eligible for up to a 20-year, 90-mph wind speed warranty.
3. **Shop-Fabricated Edge Systems** – Authorized Applicators are allowed to shop-fabricate their edge system using Carlisle's Kynar Flat Sheets. With this option Carlisle offers an ES-1 certification program to ensure the applicator can shop-fabricate their edge systems while maintaining ES-1 and IBC requirements. The option is eligible for up to a 20-year, 72-mph warranty.

Starting June 1, 2025, the following warranty coverage will take effect based on the edge system options the applicator chooses:

	Non-CCM Metal	Level 1 CCM Flat Sheet (Includes ES-1 Contractors)	Level 2 Prefab Cleat + CCM Flat Sheet	Level 3 Prefab Edge
Warranty Duration	No Edge-to-Edge Warranty Option	Up to 20 Years	Up to 20 Years	Up to 30 Years
Wind Speed Warranty	No Edge-to-Edge Warranty Option	Up to 72 MPH	Up to 90 MPH	Up to 120 MPH

Should you have any questions, please contact me at paul.markel@carlisleccm.com.

Sincerely,

Paul Markel, Product Manager – Specialty Products
